

STEM Careers Are Essential to Our Health, Happiness, and Safety

Go to ScienceBuddies.org and select the green tab labeled Science Careers. Below the colored tabs you will see grey tabs for careers in STEM. Explore the lists of careers and examples of what one might do in these careers. Identify nine different careers that are interesting to you, three each for health, happiness, and safety. Enter the career and example in the matrix.

Health		Happiness		Safety	
EXAMPLE	A nanosystems engineer could create tiny particles that can move around a patient's body, finding and killing cancer cells.	EXAMPLE	A computer programmer could help studios create cutting-edge and cool video games that are fun and help students learn!	EXAMPLE	A photonics technician could work on the manufacturing and maintenance of optical fingerprint scanners for a security company

Funded by a grant from the National Science Foundation, GSE/EXT: STEM Equity Pipeline Project, Grant No. HRD-1203121
