

Put Your Best Foot Forward in Careers Never Imagined

SMARTgirls

Science & Math Applications
in Real-World Technologies

- Engages students in career options in emerging technologies
- Encourages a strong foundation in high school math and sciences

Pennsylvania College of Technology developed Science and Math Applications in Real-World Technologies (SMART) Girls programs to counter an alarming academic and social trend: girls tend to shy away from math and sciences as they enter adolescence and their important high school years.

Upcoming Event

June 16–19, 2013

residential program

(for girls entering 9th, 10th, or 11th grade in fall 2013)

This summer camp provides the opportunity to participate in workshops that include the following topics:

- Gaming, Simulation, Web Design, and Multimedia
- Materials Processing and Manufacturing
- Construction and Design Technologies

“Step in the real world” sessions allows the chance to meet working professionals and tour real-world technology.

STEM (*Science, Technology, Engineering, and Math*) topics will be integrated throughout the week. Girls will learn skills and build confidence to pursue dreams and careers they may never have imagined.
